

# Citrisol CARPET MAINTAINER

## 100% Organic Formulation - Biodegradable

Product # 217

### DESCRIPTION

Citrisol Carpet Mantainer is a specially developed concentrated emulsion carpet cleaner for traffic areas requiring very short drying times. The all natural citrus-based solvent has a powerful cleaning action that quickly penetrates & loosens dirt and soils from carpet fibers. It is an excellent spot remover and contains a deodorizer that leaves the carpet and room area with a fresh clean citrus fragrance. Contains no petroleum distillates, organic halides or alkalies.

### USAGE

Recommended for commercial, institutional industrial and household use. Use regularly for carpet & upholstery cleaning, spot cleaning, traffic lane & bonnet cleaning. Great for busy carpeted areas where traffic is always heavy.

### DIRECTIONS

**SHAKE WELL BEFORE USE.** Not recommended for use in any machine with rubber or plastic seals, as repeated use may damage seals or hoses.

**TO SPOT CLEAN:** Vacuum thoroughly. Test for color-fastness in an inconspicuous area. Dilute 16 oz. per gallon of warm water. Apply by mopping on or spraying with a trigger sprayer or garden type pressure sprayer. Allow to penetrate, then blot soiled area. Do not over-wet or scrub. Smooth pile. **TRAFFIC AREAS:** Vacuum area. Dilute 16 oz. per gallon of warm water. Test for color-fastness. Spray lightly on carpet to begin soil break-up. Continue cleaning carpet following regular carpet cleaning instructions.

**BONNET METHOD:** Dip bonnet into diluted solution of 16 oz. per gallon of warm water. Wring out pad in a mop wringer to remove excess solution from pad. Place pad on carpet. Make sure pad lies smoothly on carpet, with no lumps or ridges. Place machine on pad. Avoid pushing machine on and off the pad. If pad is too wet or too dry, machine operation will be difficult. Turn pad over as it accumulates soil. Wash soil out of pad in another bucket of clean water, before dipping into cleaning solution. Repeat process as many times as necessary. **LIFT CHEWING GUM and CANDLE WAX FROM CARPETS:** Apply a few drops full strength and allow to penetrate. Bond of gum or wax to fibers will be broken, and can then be lifted off with a putty knife or scraper. If separation does not occur, repeat process.

**TO REMOVE TAR, GREASE, ADHESIVES, LIPSTICK, BLOOD, MASTICS, INK, CRAYON, LATEX PAINT, SHOE POLISH, TEA, COFFEE, MILK, JUICE, FOOD STAINS, BEVERAGES, ETC:** Apply a few drops of concentrate, allow to penetrate and dissolve stain. Blot spot with a clean rag. Repeat process until stain is completely removed.
