

Big Blue Tracking Dye is a flexible, user friendly, non-hazardous colorant for tracking where you just applied any kind of pesticide, herbicide or fertilizer on any type of plant, grass or turf. Big Blue Tracking Dye is a bright blue color, highly concentrated and allows the applicators to see where they have sprayed and where they have missed, avoiding double or triple layers of application which can be extremely hazardous to plants and general health. It is completely biodegradable and disappears rapidly in any weather conditions. Big Blue Tracking Dye blends completely with pesticides, herbicides and fertilizers without influencing their effectiveness. Use with backpack sprayer, pump-up sprayer, general spot applicator or large automatic tank sprayer systems.

BENEFITS

- * ASSURES uniform application of chemicals
- * ECONOMICAL, avoids multiple layer applications
- * BIODEGRADABLE, disappears in a few days, does not stain permanently
- * NON-HAZARDOUS, non-toxic components

USAGE

Recommended for commercial, institutional, industrial as well as household use. You can use it on residential, industrial, municipal, utility, right-of-way and any other application of pesticides and/or fertilizers.

DIRECTIONS

Add to water based spray solutions at the rate of 6-10 oz. per 100 gallons of spray solution. May be used with all types of spray equipment.
